Art Unit: 2879

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-4, drawn to a UV ray lamp, classified in class 313, subclass 112.
- II. Claims 5-7, drawn to a device for generating UV rays, classified in class 250, subclass 493.1.
- III. Claims 8-10, drawn to a sterilizer, classified in class 422, subclass 22.
- IV. Claims 11-12, drawn to an apparatus for treating water, classified in class 210, subclass 263.
- V. Claims 13-14, drawn to an air cleaner, classified in class 422, subclass 120.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the UV

generating device does not require a pair of electrodes as recited sub-combination claim 1. The subcombination has separate utility such a fluorescent lamp.

3. Inventions III and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because: sterilizer of claim 8 does not require a UV lamp including a pair of electrodes as recited in claim 1. The subcombination has separate utility such as the fluorescent lamp.

4. Inventions III and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the

Art Unit: 2879

particulars of the subcombination as claimed because: sterilizer of claim 9 does not require a UV lamp including an enclosure as recited in claim 5. The subcombination has separate utility such as the fluorescent lamp.

5. Inventions IV and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the apparatus of claim 11 does not require the UV ray lamp including a pair of electrodes as recited in sub-combination claim 1. The subcombination has separate utility such as the fluorescent lamp.

6. Inventions V and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by

Art Unit: 2879

itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because: an air cleaner of claim 13 does not require a UV lamp including an enclosure as recited in claim 5. The subcombination has separate utility such as the fluorescent lamp.

7. Inventions (III and IV) or (III and V) or (IV and V) are unrelated.

8. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

9. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II or III or IV or V, restriction for examination purposes as indicated is proper.

10. A telephone call was made to Mr. Glenn Perry on July 10, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2879

11. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

12. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
